***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 33-34, drawn to an apparatus for language communication, classified in class 283, subclass 46.
  - II. Claims 16-32 and 35-39, drawn to method for facilitating communication, classified in class 434, subclass 112.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process. The product could be used as part of an educational program for teaching languages to students. The concept of using such devices in this manner is supported by Patent No. US 3271884 to Roberson, cited by applicant. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Further these inventions are distinct as the search required for Group I is not required for Group II.
